

XPG PRECOG GAMING HEADSET

The XPG PRECOG is the world's first dual-driver pro-gaming headset, equipped with dynamic electrostatic drivers, preset audio modes, and an insanely ergonomic design. The XPG PRECOG is designed for epic sound quality and long-session comfort.

Dual Electrostatic Dynamic Drivers

The XPG PRECOG is the world's first gaming headset equipped with dual dynamic electrostatic drivers. The drivers are designed to cover high and low frequencies, giving you clear, distortion-free audio.

Situational Awareness with FPS Mode

Don't get caught off guard! Hear footsteps and gunfire clearly and know which direction they're coming from. Virtual 7.1 Surround Sound and Music modes also provided.

Environmental Noise Cancellation

XPG PRECOG microphone is detachable microphone with Environmental Noise Cancelling (ENC) technology, so your comrades will hear you loud and clear without unwanted ambient noise.

Ergonomic Design for Long-Session Comfort

Angled memory foam ear cushions for a more natural fit, and the rotatable ear cups swivel 90° so they don't cut into your neck during breaks.
