Premier Extreme SDXC SD8.0 Express Card

The next-generation Premier Extreme SD 8.0 Express memory card, similar to a miniature SSD, provides transfer speeds up to 1,600/1,200 MB/s, approaching PCIe Gen3 x2 speeds. Supporting PCIe and NVMe, it is an excellent choice for professional content creators.

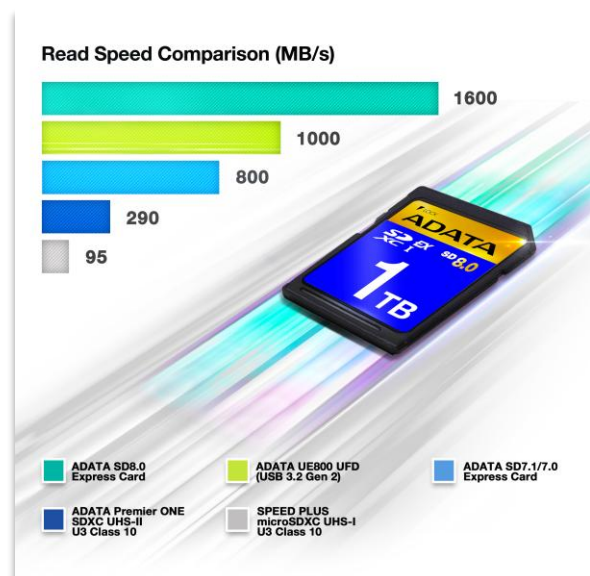

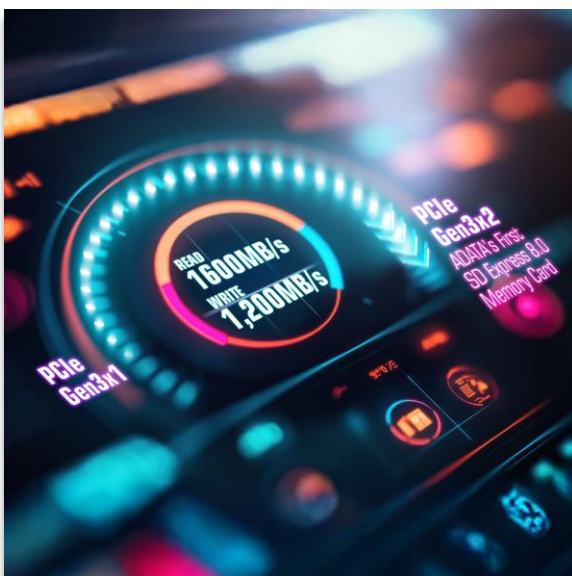

Flexing SD Express

The next-generation Premier Extreme SD 8.0 Express memory card delivers transfer performance up to 1600/1,200 MB/s, which is 4 times faster than a high-speed UHS-II SD card and 12 times faster than a standard UHS-I SD card.

* Regarding SD8.0 compatibility, please refer to information provided by your device manufacturer

Future Portable Storage with SSD-Level

The Premier Extreme SD 8.0 Express memory card adopts PCIe and NVMe protocols, using the PCIe Gen3 x2 bus speed to increase read/write performance to 1,600/1,200 MB/s. It ensures all transfers, whether of large files, random small files, or dynamic or static image output, are completed at the highest performance.

Safe, Durable, and Reliable Data Protection

The memory card features an SSD-level LDPC (Low-density parity-check code) automatic error correction function and has passed water resistance, shock resistance, X-ray resistance, anti-static, and high temperature and extreme cold resistance tests, offering the best protection for important data.

Ultra-clear Dynamic Recording

The Premier Extreme SD 8.0 Express memory card can maintain a minimum write speed of nearly 1600/1,200 MB/s and is backward compatible with video speed classes below V30, perfectly facilitating low latency, high-speed photography without frame drops.

Features

- Next-gen SD Express format
- Certified by the SD Association SVP
- V30 Video Speed Class support
- High capacities
- Secure, durable, and reliable

Specifications

- Capacity: 1TB / 512GB
- Standard: SD8.0
- R/W performance: up to 1,600 / 1,200 MB/s*
- Speed Class: U3 / C10 / V30
- Dimensions (L x W x H): 32 x 24 x 2.1mm
- Weight: 2g
- Warranty: Lifetime

*Max speeds only when paired with SD Express compatible device

*Backward compatible with UHS-I HOST, at Max speed of 104 MB/s
